Handling of the IoT Router itself

https://manual.amnimo.com/docs/uncategorized/handling-of-the-iot-router-itself/

 Warning.		● Do not disassemble or modify the product. Doing so may cause fire, electric shock, or injury. Do not insert pins, wires, or other metal objects into the main unit. Doing so may cause abnormal operation, resulting in injury, electric shock, or malfunction. Do not allow children to use this product alone or keep it out of the reach of young children. Doing so may cause electric shock, injury or burns. Do not immerse the main unit in water or splash water on it. Doing so may cause a short circuit, electric shock, or fire. Do not use the product outdoors or in places where it may be exposed to water, such as bathrooms. Doing so may cause electric shock or short circuit. Do not use organic solvents or detergents such as benzene or thinner for cleaning. Doing so may cause discoloration, deformation, or damage. ● Use the AC adapter and DC power cable of the accessory (sold separately) for the power supply, and do not use anything other than the rated voltage. Failure to do so may cause malfunction, fire, or electric shock. Do not stack units when the power is on. The bottom part (the side with the nameplate attached) may become hot, which may cause burns or affect other equipment.
		In case of abnormality or malfunction, unplug the power cable immediately and discontinue use. Using the product as is may result in fire, electric shock, or injury.

 attention (heed)		When using this IoT router, it must be installed in a fixed or stable location. To be secured by using fixing fixtures of accessories (sold separately), etc. This is for the stable operation of this IoT Router and to avoid any possible human health hazard.
