Open custom maps from various locations.

Custom map views can be opened from multiple locations.

NOTE

The images are from an integrated video management system, but the basic operation method is the same.

Open from the [Cloud Save Video / Image] menu

1. [In the Cloud Storage Videos/Images, click Map Location in the thumbnails.
2. A custom map will open with the camera plotted on it.

Open from selected camera (CLOUD/DIRECT)

1. Select a camera from the camera detail screen and click on the map icon.
2. A custom map will open with the camera plotted on it.
