Listen to the camera's audio

Video playback and operation · https://manual.amnimo.com/docs/video-playback-and-operation-en/listen-to-the-cameras-audio-2/

The Cloud Video Recorder offers voice support features.
When using a supported camera, video can be played back with sound during LIVE playback and Video On Demand (recording) playback.

NOTE

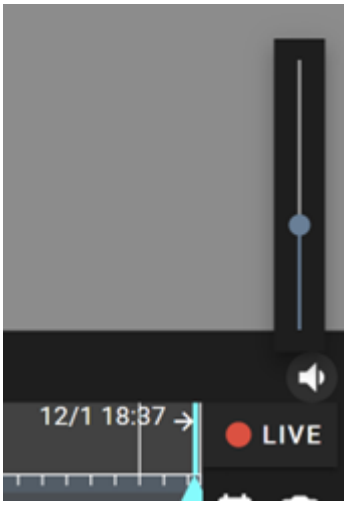

Only AAC audio codecs are supported.

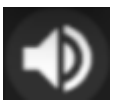

WARNING

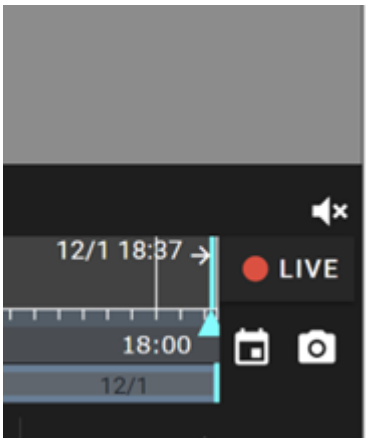

With this function, the audio may lag behind the video for up to 1 second.

Listen to the audio of the video

Play the video from the camera whose audio you want to hear, and adjust the volume control to adjust the volume of the audio.

 Click the icon to mute the sound.
