Retrieving Video Clips

Video playback and operation · https://manual.amnimo.com/docs/video-playback-and-operation-en/retrieving-video-clips/

1. Select the camera from which you want to retrieve the video clip and click on the video clip icon ( ).

2. Select a date and time on the timeline bar or click Acquisition Date and Time to select a date and time from the calendar. After entering any name for the video clip, click Acquire.
   - **Click on the timeline and select the date and time**

   - **Select a date and time from the calendar**

     When an incorrect time is selected, the selected area on the timeline is displayed in red.

3. When the cursor is moved over the time period selected for acquiring video clips (indicated by the dashed line) on the timeline bar, the message "acquiring" will appear.

4. On the timeline bar, click on the time period in which the video clip was acquired (the area in blue) to play the acquired video clip.

5. The retrieved video clips can also be viewed on the Cloud Saved Videos/Images page.
