Play audio from saved videos

If audio was recorded in the saved video, it can be played back along with the video.

NOTE

You must enable and record audio in NxWitness in advance.

Configuration in Nx Witness

1. Open the Nx Witness desktop client.
2. Right-click on the camera and click on Camera Settings.

3. [Check the "Enable Audio" checkbox and click "OK".

Control the volume

Open the saved video and use the volume control shown in the figure to adjust the volume of the audio. You can also mute the sound by clicking on the volume control icon.
