Product Overview

Introduction · https://manual.amnimo.com/en/docs/introduction-en-5/product-overview/

WARNING

This product is for domestic use only.

Summary

Amnimo Portable (AMP) is a battery-powered, flexible network camera that can be installed anywhere. Seamlessly integrated with the AMNIMO Portable Cloud Service, this product can be used for a wide range of applications, including on-site monitoring, applications where temporary installation is required, and wearable use.

feature

- Portable network camera with mobile connectivity and battery power for installation anywhere
- Seamless integration with Amnimo Portable Cloud Service for easy remote video confirmation
- Thumbnail images uploaded periodically from Amnimo Portable, live playback, and recorded video playback when recording data is sent to the cloud
- Easy setup with no installation required
- Portable surveillance power at an unparalleled low cost

system configuration

Amnimo Portable Cloud Service consists of Device Management System (DMS) and Integrated Video Management System (eVMS). Please refer to the following manuals for more information on each cloud service.

- Device Management System Manual
- Integrated Video Management System Manual
