User Selection and Name Tag Display

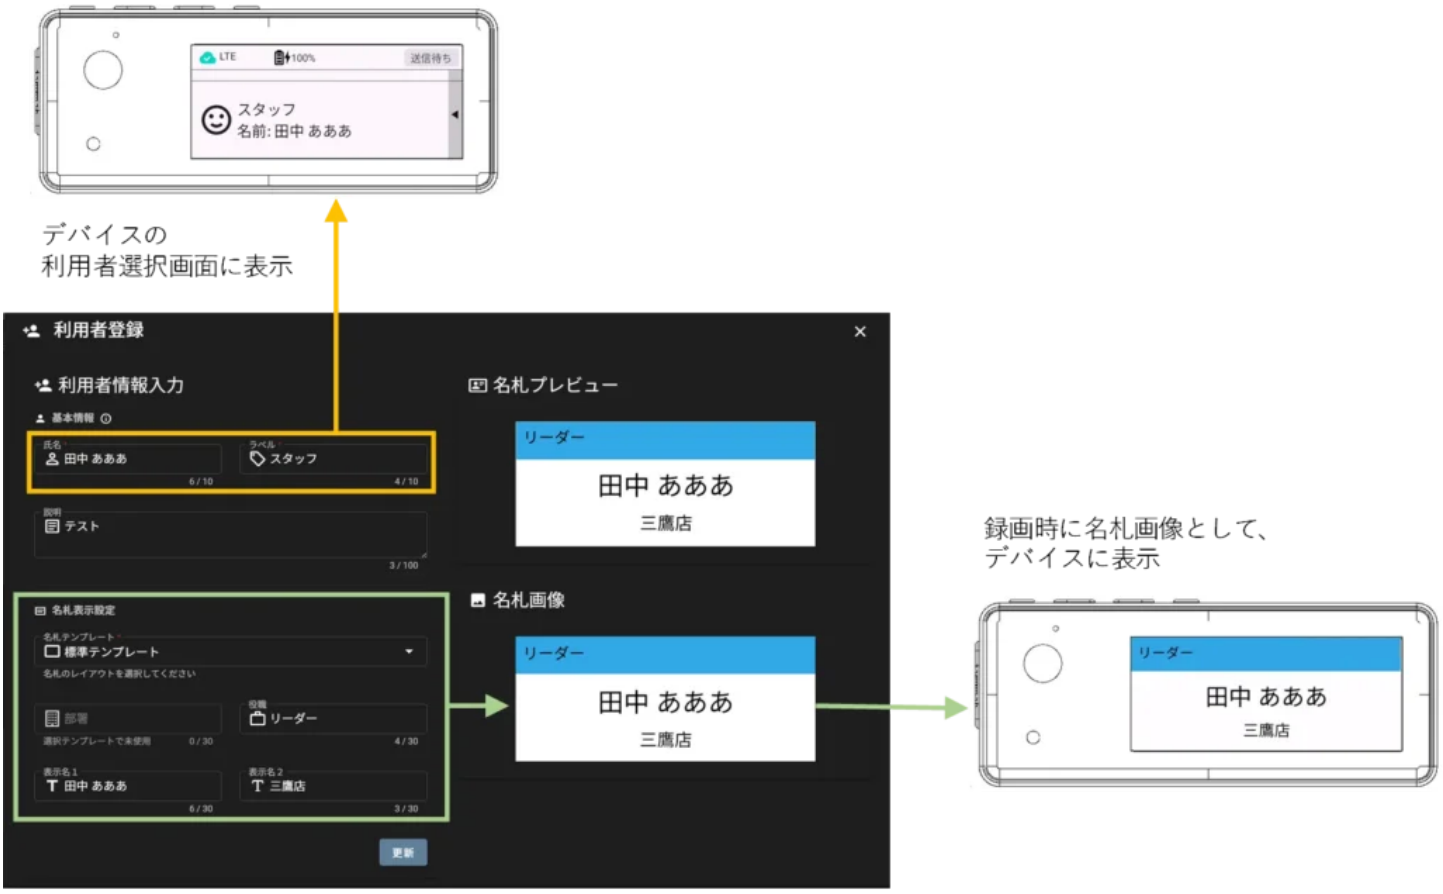

CAUTION

This function is not available on the Amnimo portable device (AB11).

The Amnimo Portable Device NP (AB12) downloads user information, including nameplate data registered with the tenant in the integrated video management system.
This user information allows for user selection and nametag display on the monitor.

NOTE

If user information is added or modified, the device must be connected to the network for the information to be reflected on the device.

Please refer to the following for user information registration in the integrated video management system.

⇒ Integrated Video Management System "About nameplate management
