Obtaining Snapshots

Video playback and operation · https://manual.amnimo.com/en/docs/video-playback-and-operation-en/obtaining-snapshots-3/

NOTE

Up to 300 snapshots can be taken per camera. Snapshots can be taken once the camera is "activated".

This section describes two types of procedures for taking snapshots.

Obtain a snapshot at any given time

1. Select the camera for which you want to take a snapshot and click the snapshot icon ( ).

2. Select a date and time on the timeline bar or click Acquisition Date and Time and select a date and time from the calendar. After entering an arbitrary name for the snapshot, click Acquire.
   - **Click on the timeline and select the date and time**

   - **Select a date and time from the calendar**

3. The acquired snapshots can be viewed on the Cloud Storage Video/Image page.
   The Cloud Storage Video/Image page can be accessed from the menu.

Obtain a snapshot of the camera image being displayed

1. Click on the camera icon ( ).

2. The acquired snapshots can be viewed on the **Cloud Storage Video/Image** page.
   The Cloud Storage Video/Image page can be accessed from the menu.
